CENTRAL INTELLIGENCE AGENCY  
WASHINGTON 25, D. C.

MAR 29 1951

MEMORANDUM FOR: The Administrator, General Services Administration  
SUBJECT : Personal Property Management Regulation No. 16,  
dated 9 February 1951, subject: "Program Schedules  
and Materiel Requirements".

1. Early in the development of the National Production Authority it was visualized by this Agency that reports such as described in subject regulation would be required from all Government Agencies. Accordingly, arrangements were undertaken to have this Agency's reporting of material requirements provided for in a manner which would generally conceal, for reasons of security, the extent of its overall procurement program.

2. On 7 November 1950, an agreement was reached between representatives of the National Production Authority, the Department of Defense, Munitions Board and this Agency; whereby the Central Intelligence Agency would submit its complete schedule of material requirements to the Department of Defense, Munitions Board, who would in turn combine these requirements with those of the Department of Defense for presentation to the National Production Authority. This arrangement has been functioning quite satisfactorily.

3. In view of the foregoing information, a negative report is submitted by this Agency in response to subject directive.
